# TWELVE MUST FIGHT TOGETHER!

Many years ago, the legendary Twelve Warriors fought against the War-Mage, Bane, to stop his plans to take over the continent of Oldeland. But Bane was not defeated, he was only forced to retreat to his own kingdom.

**Bane has not given up his ambitions.**

Ten years have passed, and his army, commanded by five super-powerful leaders, has managed to abduct the Queen of the realm before retreating. Prince Aragon, the Queen's only son and the hero of our story, has lost his rightful throne. But in Queensland's darkest hour he knows he is the only hope left, and will fight to the end to win back his homeland.

Prince Aragon needs help. The five leaders under Bane's command are powerful adversaries. Aragon must enlist the aid of eleven adventurers, the strongest warriors he can find. He must travel through the lands of Oldeland, fighting Bane's legions as he gathers his group together for the final showdown — against the dreaded War-Mage, Bane, himself!

# STARTING OUT

*If you're using an external memory cartridge, remember to insert it before turning on your Sega Saturn. Up to three Adventures may be stored in both the internal and external memories.*

After the opening sequences, the Title screen appears. Press **Start**. Highlight either **NEW GAME** (if you're just starting out) or **CONTINUE** (if you've saved an adventure you want to continue), and press **Start**, **A** or **C**.

INTERNAL-EXTERNAL RAM MEMORY

If you're continuing an Adventure, the Adventure Select screen appears. The top of the screen shows the displayed memory (internal or cartridge) and the saved Adventures.

If you're using a cartridge memory, you can switch between it and the internal memory by pressing the **D-Pad** left or right. Select an Adventure by pressing the **D-Pad** up or down until the Adventure is highlighted, then press **Start** or **C**.

# NEW ADVENTURES

After a short introduction, you and your fighting force appear on the battlefield, facing Bane and his troops. When a spinning pyramid appears at the bottom of the conversation window, you can forward to the next part of the conversation by pressing **C**. Press **C** repeatedly to speed through conversations.

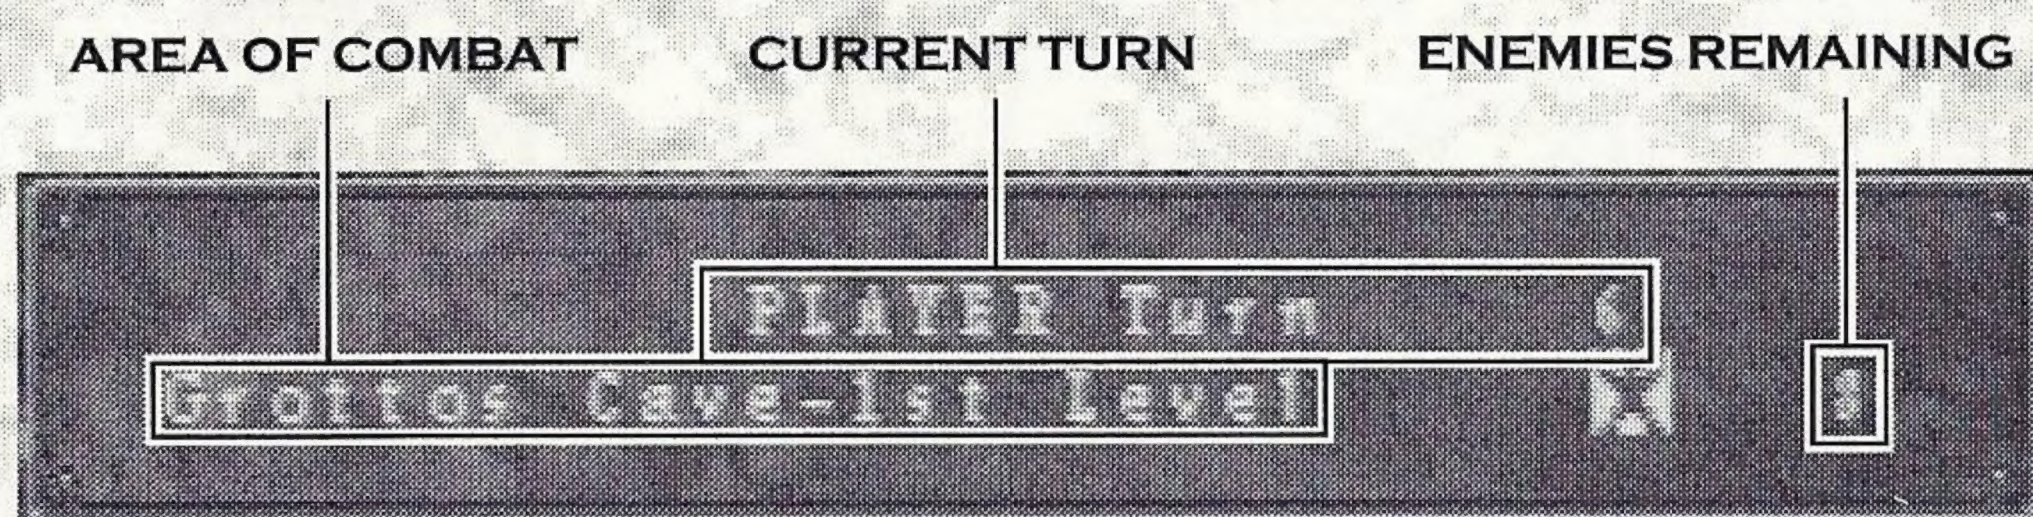

At one point during each character's conversation with Bane, a biography of that character appears. Press **C** when this screen appears to open the Name screen and rename the character (or press

**B** to leave the default name as is). Erase the current name by pressing **B** repeatedly, then move the cursor to a letter and press **C** to enter it. When you're finished, move the highlighter to **End** and press **C**. Press **B** to exit the screen. To reset the name, press **B** until all the letters of the name disappear, then press **B** again.

## On The Field

At the beginning of the player turn, a window appears at the top of the screen, describing the current situation.

The bottom of the screen shows your members current HP (Hit Points) and MP (Magic Points) status (HP in blue; upper bar and MP in green; lower bar). The highlight brackets are used to select characters for movement, and to check enemy status and ground type.

## *General Options*

Press **B** at any time to see the Main Options window. Here are your options:

**End Turn:** Ends the player turn (starts the enemy turn phase).

**Retreat:** Escape from the battle (not always available).

**Main Map:** Shows the location of your fighters on a large map of the battle area. Press **C** again to see your battle area's location in Oldeland (if your party is above ground). Press **B** to exit the map.

**Consult:** Ask your Guardian Sprite for battle advice.

**Party:** Shows various stats for all your fighters (see Party, page 12 for an explanation).

**Load:** Load an adventure from the RAM memory (see page 16).

**Options:** Set various game options (see page 12).

## *Character Movement*

Move the brackets to a teammate with the D-Pad (or press **L** or **R** to cycle through available teammates) and press **C** to select. That character's HP/MP and experience level appear at the top left corner of the screen, and T Menu battle techniques are shown on the right side of the screen.

The character can now move anywhere on the highlighted grid (or if you've turned the Grid option off, anywhere in the lit area). Move the brackets to a location on the grid/lit area, and press **C** to move the character to that place—press **C** twice to speed up movement.

Use the teammate to attack, defend or perform a function listed in the Character Options on the next page. Once the teammate has finished his or her turn, an **E** (End) appears on the character. The enemy attack phase begins when all the teammates have finished moving.

## Character Option Windows

Three of these windows display your character's available battle techniques (the T Menu), and the fourth contains the non-battle options.

**Battle Technique Options:** These techniques are used for offense and/or defense depending on how you've set them in the T Menu (see page 11). Press the D-Pad left or right to cycle through the four windows, press the D-Pad up or down to move the cursor to an option, then press C to select the option/perform the technique.

**Attacking:** Characters may perform single or multiple attacks, depending on their surroundings. When performing a multiple attack, blue triangles appear above all monsters the attack can reach. When performing a single attack, the blue triangle appears above an enemy, and a highlighter appears around the enemy's feet. If more than one enemy is in range, press L or R to move the triangle and highlighter to another enemy. When you're ready to attack, press C.

SINGLE

MULTIPLE

*Defending:* Some techniques are used only to protect that character or other characters. Select the character to protect as you do for attacking a single enemy (explained above).

## PICKING THE PARTY

Once you have more than six teammates (soon enough!), you need to select the members of the battle party from the Team Circle before entering the fray. The Prince and Raiko are usually selected, but you need to think carefully about who else to use. Some battle areas require spellcasters, others require brute strength.

MAXIMUM MEMBERS POSSIBLE

SELECTED MEMBER

TEAM CIRCLE

Press the D-Pad left or right to cycle through the Team Circle. Press **C** to select/deselect members (the maximum number you can select is shown at the top left corner of the window). Press **B** when finished to bring up the confirmation window. Ready? Then move the arrow to **Yes** (to start the battle), or **No** (to reselect members) and press **C**.

## IN TOWN

Shopping, making inquiries, saving games, checking on the status of the members in your group; all of these things and more are available in the towns of Oldeland! When you reach a town, you need to confirm that you want to enter it. To enter the town select **Yes** in the Confirmation window. If you reconsider, select **No**.

## WHERE TO GO AND WHAT TO DO

There are a number of activities to do in towns. At the end of most town's Main Street there is a message board which displays information about the goings-on in that town. You can enter Houses and chat with the townspeople (see page 21), buy weapons, armor or other items (see page 17) or check various information about your teammates from the Town Options window.

Press **C** to see the Team Circle, and press the D-Pad left or right until the character you want to check is standing on the white circle. Press **C** again and that character's T screen appears. The nine current techniques appear at the bottom of the screen, with a cursor next to a technique. The technique's explanation appears on the top half of the screen.

- Techniques displayed in **white** can be placed in the T Menu.

## SHOPS AND SHOPPING

Step into any shop and you find yourself surrounded with the finest Oldeland has to offer. From A to Z, there's nothing you won't be able to purchase—providing of course you have enough Gold.

### ARMOR

When you want the best in defense, step into the Armor shop, where every imaginable type of armor, helmets, shields, gauntlets and magical defense items are available.

### WEAPONS

In this shop you can find swords, spears, bows and war hammers. Feel free to browse!

### TAVERN

Pick up the latest information from the proprietor of the town tavern. There is often special information to be found, and sometimes new teammates to contact, and it's a good bet that the Tavern's proprietor can help you out.

### TOOLS

Magical Rings and Medical Potions are among your choices here. This shop has a potpourri of Items to choose from—take your time.

### MARKET

In smaller towns, you may find this shop instead of the Armor and Items shop. This shop combines the two. Don't worry, though, you should be able to find what you're looking for.

### ARENA

Step right up, adventurers, come one come all to the Arena, where you pit a member of your party against more than one opponent for fun and profit!

## BUYING ITEMS

Once you enter a shop, you have three choices: **Buy** an item, **Sell** an item or **Exit** the shop. Move the cursor to your choice and press **C**. If you're Buying an Item, the following screen appears:

- 1 This window shows the Item type, the name of the item and its asking price.
- 2 The Character Window
- 3 An explanation of the Item's point effects (when the item is equipped), and any magical effects the item has.
- 4 The character can't use the Item (wrong character type).
- 5 The character is already equipped with the item.
- 6 The Item will increase the character's skills.
- 7 The Item will decrease the character's skills.
- 8 The party's current Gold funds
- 9 An explanation of the Item, including any magical effects.

The Character window shows the item's effects for each character. If the character's face is dark, the character can't use that weapon. If the arrow points up, the item will improve some aspect of the character's skills, and if the arrow points down, that character's skills will be lowered. An **E** appears if the character is already equipped with the item.

Press the **D-Pad** left or right to pick how many of the item you want (the window appears above the Gold amount), then press **C** again. A description of the item appears at the bottom of the screen—press **C** again to buy the item, or **B** to cancel. When you're finished, press **B** to exit the screen.

## SPECIAL WEAPONS AND ARMOR

Keep in mind that many weapons you come across in Oldeland will have more than just one effect on a character, and some have a special effect on some monsters. For example, if a character has a strong Defense rating but is easily affected by magic spells, the Silver shield (Defense + 32 and protection against magic) might be a better choice than the Great shield (Defense + 48).

## ARENA

Walk through the gates and the master of ceremonies (he's the guy with the happening headgear) asks you your pleasure. Get acquainted with the rules by selecting **Listen**, jump into the action with **Partake** or if you reconsider, select **Exit**.

If you select **Partake**, the Character circle appears. Select a character and press **C** and a list of possible opponents appears, showing their rank on the list, name, Experience level, the number of opponents you'll be facing, and the prize sum if you win.

A screenshot of the 'Arena' opponent list table. The table has five columns: Rank, Name, Lev., Num., and Gem. The rows list various opponents with their respective stats. The 'Partake' option is highlighted in the top left corner of the table area.

Rank	Name	Lev.	Num.	Gem

22	Scaleus	20	4	19500
23	Mach	21	4	23000
24	Magician	22	4	25000
25	Seele	23	4	27000
26	Scaleus	24	4	30000
27	Magician	25	4	33000
28	Marauder	26	4	36000

Who's the enemy?	Gold	148671
------------------	------	--------

Move the cursor to an opponent and press **C**. When the Confirm window appears, enter the contest (select **Yes**) or pick a different opponent (select **No**). Press **B** at any time before the battle to exit the screens.

The object is to defeat all the opponents in the Arena in 20 turns or less. You may find yourself in the outdoor or indoor arena, depending on the type of enemy you're facing. Experience, increased levels and new techniques can all be gained in the Arena (not to mention prize money). The battlefields are smaller than you're probably used to, and there's only one of you, so you'll need to use tactics to fight, not just brute force.

## HOUSES

Find out information about upcoming opponents and hints regarding your quest. And don't be shy—make it a point to talk to all the locals when you enter a town or you risk missing vital news. Move the cursor to a conversation topic and press **C** to hear what the person has to say. When you're finished, select **Exit**.

## PUBLIC NEWS BOARDS

Many towns have a public news board at the far end of Main Street. Step up and read the various notices written by the townspeople. These often have a bearing on your quest, and may even lead you to important new allies.

## OUTDOOR ADVENTURING

When traveling through Oldeland, you might wonder where you are and where to go. Signposts can be found here and there by the main road. Step up and take a look—the nearest towns and Kingdoms are listed on each signpost.

A map appears at the bottom left corner of the screen when you are walking from place to place. Use this as a general guide to where you are (your current position is shown by a blinking white light, and areas you can enter are displayed in red).

Be careful when traveling from one Kingdom to another. Bandits have heard of Bane's return and are taking the opportunity to try and relieve travellers of their gold.

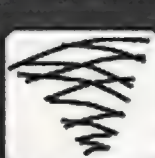

# TECHNIQUES

This is a partial list of the techniques used by the warriors of Oldeland. There are, of course, even more powerful ones than these and it's up to you to make sure your team learns the skills they need to defeat Bane and the ultimate evil!

# AND FINALLY

Some tips for travellers in Oldeland.

## GENERAL

- Certain battle situations are better suited for some warriors than others. Once you enter the battle zone, check out the geography, then retreat and reselect the battle party to fit the situation.
- Arenas are ideal training grounds for your characters, and allow you to pick up extra Gold as well as information about the kinds of enemies you'll be facing in real battle later on.
- Study the geography of Oldeland well, and note the locations of all the areas on the World Map. Some areas may seem inaccessible at first—perhaps you'll find the means to get to them later on.
- Make special note of your characters' weaknesses, and figure out the best way to make up for those weaknesses. For characters who fall under spells easily; protect them with magic shields and keep them out of the way when facing spellcasting enemies. If a character can climb hills easily, select that character for mountain battles.
- Press L or R in Town or on the Main Map when walking around to change the character shown on screen. When saving Adventures, the face of a character appears next to each Adventure in the memory. Use this function to remember which Adventure is which by selecting a character before you save an Adventure so that the character's face appears in the RAM memory.

## BATTLE SHORTCUTS

- Press L or R to move the highlighter directly from one teammate to another.
- Press C and hold to speed up the enemy turn phases.
- If no enemies are left and you are making for the other end of the battlefield, move the teammate closest to the exit as far as his or her movement allows, then end the turn without moving the other teammates. Continue until the character reaches the exit.
